

# Agenda for Novell CHS Roadshow events

## 14-16<sup>th</sup> June 2011

09:15 – 9:30 Registration

**09:30 – 9:45 Novel intruduction** – new ownership, new strategies,new solutions, new products

**9:45 – 10:00 Data Center Solutions**

**SUSE Linux Enterprise Server** – Reliable, Interoperable and Manageable Foundation for Physical and Virtual Mission Critical Workloads.

Get the most from your systems and reduce expensive downtime with this SUSE Linux Enterprise Server solution, which is interoperable with other platforms and also more affordable solution than UNIX.

10:00 – 10:50 **End-user computing solutions – System and resource management**

**ZENworks Family solutions** – Software asset management is the key to compliance and smart purchasing. **ZENworks Endpoint Security Management solution offers a secure, identity-based protection for the endpoints.**

ZENworks solutions provide faster ROIs and less average payback time. **The key to reducing costs is knowing, easily managing and securing what you have.**

**Open Workgroup Suite** – Modernizing your infrastructure and boost workforce productivity.

Novell Open Workgroup Suite provides a secure, flexible and cost-effective IT infrastructure, a proven set of workgroup services and next-generation collaboration tools at a competitive price.

10:50 – 11:00 Short break

11:00 – 11:50 **Identity and Security solutions**

**Sentinel Log Manager** – Log Management & Compliance Management for Simplified Compliance and Security. Fast ROI through simple data collection setup by collecting and archiving event logs from almost any source right out of the box and minimize storage costs by no need for expensive, proprietary storage systems.

**Identity & Access Management, SecureLogin, Single Sign-On, Privileged User Manager** – How to securely and automatically manage the access needs of all Identities.

Identity and Access Management solutions from Novell provide the foundation for a secure, risk-aware enterprise. By managing identity and access across physical, virtual and cloud environments, this intelligent framework allows you to leverage your existing IT assets and new computing models like SaaS, while reducing cost and ensuring compliance.

11:50 - 12:20 **Data Center – Virtualization and Cloud solutions**

**Platespin Family solutions** – Virtual Capacity Management, Consolidation Planning and easy Server Workload Migration.

Discover detailed information about each server hardware and software assets, and optimize performance. Perform anywhere-to-anywhere migrations to and from physical servers, virtual hosts, and image archives, with broad support for 32- and 64-bit Windows and Linux operating systems.

**Cloud Manager** – The simplest way to build and manage your cloud environment.

Novell Cloud Manager, a WorkloadIQ™ product, fully automates complex provisioning workflows – from requests and approvals to creating and deploying new business services. This solution unifies your heterogeneous infrastructures into one seamless fabric for unparalleled efficiency and speed.

12:20 – 12:30 Short break

12: 30 **PHD Virtual backup**

12: 50 End of event
